Human Resources Department

Environmental Compliance Inspector II
Class Description

Definition

Under general supervision, performs a variety of technical tasks associated with the inspection of industrial and commercial discharges to the sewer system for compliance with applicable laws and ordinances; conducts a variety of on-site and facility inspections related to Industrial Pretreatment, Pollution Prevention, and Stormwater Inspection and Monitoring Programs; performs public outreach activities related to pollution prevention; conducts and reviews field measurements and laboratory analysis of industrial waste samples and wastewater flow; and performs related work as required.

Distinguishing Characteristics

This class is a journey level within the Environmental Compliance Inspector series. Employees within this class are distinguished from the Environmental Compliance Inspector I by the performance of the full range of duties as assigned. Positions assigned to this class are required to have complete working knowledge of Industrial Pretreatment Pollution Prevention and Stormwater programs and regulations and are expected to carry out assigned duties and responsibilities with minimal supervision. Employees at this level receive only occasional instruction or assistance as new or unusual situations arise, and are fully aware of the operating procedures and policies of the work unit.

Typical and Important Duties

(Essential and other important responsibilities and duties may include, but are not limited to, the following:)

1. Enforces Federal, State and local regulations, including but not limited to, Industrial Pretreatment, Pollution Prevention, and Stormwater programs by conducting facility inspections of industrial, commercial and residential facilities; reviews related records and documents to assist in the inspection.
2. Conducts and reviews field measurements and laboratory analyses of industrial waste samples and wastewater flow to determine compliance with applicable laws and ordinances.
3. Conducts on-site inspections of construction sites for compliance with related regulations including erosion/sediment control and new development regulations; assists in reviewing plans for sediment and corrosion control.
4. Conducts on-site inspections of food facilities to enforce the Fats, Oils and Grease (FOG) programs.
5. Reviews, evaluates, recommends and approves business license and wastewater discharge applications and permits as appropriate.
6. Establishes and maintains self-monitoring programs for industrial users.
7. Enters a variety of program compliance laboratory data, including, but not limited to, Industrial Pretreatment, FOG programs, Storm Water and related programs into tracking databases to assist in ensuring compliance with related regulations.

8. Conducts on-site inspections of commercial and industrial users; issues notices of violation, administrative citations and fines to facilities for non-compliance issues related to Stormwater programs, Industrial Pretreatment and other related programs.
9. Conducts public outreach related to pollution prevention and related programs; coordinates public events; teaches sewer science class at various schools; develops public outreach materials; and attends various meetings with City officials, non-profits, local agencies and other interested parties regarding wastewater and pollution prevention.
10. Responds to public complaints, spills and illicit discharges in service area; issues notice of violation; and coordinates cleanup and mitigation.
11. Conducts pollutant impact studies on treatment processes relating to industrial waste.
12. Collects data relating to the sewer rental program, computes charges and reviews protests.
13. Gathers evidence for, and recommends administrative or other legal action.
14. Monitors Stormwater Pump Stations for trash and pollution.
15. Establishes and maintains cooperative relationships with those contacted in the course of work.
16. Performs other related duties and responsibilities as assigned.

Job-related Qualifications

Knowledge of:

- Operations and activities of sewage collection and wastewater treatment facilities.
- Methods, techniques and procedures used in site inspections.
- Chemistry and chemical engineering.
- Pertinent Federal, State, and local rules, regulations and guidelines related to industrial wastewater discharge, industrial pretreatment and stormwater programs.
- Procedures used in handling hazardous materials.
- Techniques used in a laboratory; and sampling procedures.
- Techniques and methods of sanitary engineering in conjunction with the interpretation and enforcement of laws, codes and ordinances.
- Basic arithmetic.
- Safety principles, practices, regulations, and procedures related to the work, including OSHA regulations.
- Principles and practices related to recordkeeping.
- English usage, spelling, grammar, and punctuation used in report writing.
- Safety principles, practices, regulations, and procedures related to the work, including OSHA regulations.
- Principles and practices of customer service.
- Modern office equipment, methods, procedures, and computer hardware and software.

Ability to:

- Understand and interpret applicable codes, laws and ordinances.
- Independently perform routine inspections of sites and facilities to identify compliance issues.
- Perform routine chemical analysis.

- Identify hazardous materials and respond appropriately.
- Maintain accurate records and files.
- Accurately prepare required reports.
- Make accurate arithmetic calculations.
- Observe proper safety precautions and procedures.
- Take a proactive approach to customer service issues.
- Understand and carry out oral and written directions.
- Work in a safe manner, following City safety practices and procedures; safely handle hazardous materials; identify, correct, and report safety hazards; and administer first aid.
- Organize own work, set priorities, meet critical deadlines, and follow-up on assignments with minimal supervision.
- Communicate effectively in writing and orally, and with others to assimilate, understand and convey information, in a manner consistent with job functions.
- Establish and maintain cooperating working relationships with those contacted in the course of work.
- Maintain confidentiality regarding sensitive information.

Skill in:

- Operating a personal computer and a variety of software applications.

Experience and Training

Any combination of experience and training that would provide the required knowledge, skills, and abilities would be qualifying. A typical way to obtain the knowledge, skills, and abilities would be:

Experience:

One year of experience comparable to an Environmental Compliance Inspector I with the City of South San Francisco.

Training:

A bachelor's degree from an accredited college or university with major coursework in environmental science, biology, microbiology, chemistry or a related field. Additional qualifying experience may be substituted for up to two years of the desired education on the basis that two years of experience equals one-year of education.

Licenses and Certificates

All licenses and certificates must be maintained as a condition of employment.

- Possession of, or ability to obtain and maintain, an appropriate, valid California driver's license and maintain a satisfactory driving record.
- Possession of, or ability to obtain and maintain, a Confined Space Certification by the end of the probationary period.
- Possession and maintenance of an Environmental Compliance Inspector Grade II Certification issued by the California Water Environmental Association.

Special Requirements
