Popsicle Stick Shelves

Supplies

- 78 popsicle sticks to make one hexagon. (Use more or less to achieve the desired depth of the shelf).
- Craft glue or hot glue
- Hexagon pattern

Directions

1. Lay out your shape using six popsicle sticks.
2. Begin by forming your sticks into a hexagon shape. Note that your sticks will overlap each other – this is how it should be. This is also where you'll add the glue.
3. Lay one stick down and place two sticks running up at an outward angle from that bottom stick. Glue sticks into place.
4. Place two more sticks in the opposite direction of the first two, running diagonally and glue in place.
5. Take a final stick and glue on top to the last two sticks that you attached. Now you have the shape of your hexagon.
6. Repeat this same procedure, gluing the sticks down as you go. Start from the bottom, then add the two diagonal sticks, etc.

Optional: Stain or paint your shelf.
